

Jail monitoring questionnaire files (GRS-2507)

Utah General Retention Schedule

Description

This is the raw data received from county sheriffs in the state indicating the number and types of juveniles held in jails. This information is used to prepare the Detention Data Report. This record includes the name of county; the name of the youth offender; the youth's sex, age, and race; the alleged violation; the date the youth was admitted to jail and the date released; to whom the youth was released; and the total length of time the youth was held.

Retention and Disposition

Retain permanently. Transfer records to the archives.
