AGENCY: Iron County (Utah). County Recorder

SERIES: 83764

4

TITLE: Abstracts

DATES: i 1879-1973.

ARRANGEMENT: Chronological

DESCRIPTION:

The county recorder creates abstracts that contain the history of property ownership by providing a true chain of title by geographical location. They contain the date and character of instrument, book and page number where instrument was recorded, entry number of instrument, and legal description.

RETENTION AND DISPOSITION AUTHORIZATION:

These records are in Archives' permanent custody.

FORMAT MANAGEMENT:

Microfilm master: Retain in State Archives permanently with authority to weed.

Paper: Retain in Office permanently after being microfilmed.

Microfilm duplicate: Retain in State Archives permanently with authority to weed.

AGENCY: Iron County (Utah). County Recorder

AGENCY: Iron County (Utah). County Recorder

SERIES: 17476

3

TITLE: Court document record books

DATES: 1889-

ARRANGEMENT: Chronological

DESCRIPTION:

County recorder's copy of probate and civil court records establishing title to real estate and other property. The volumes include only copies of decrees of distribution, record of sales, lis pendens (foreclosure suits), orders to quiet title, and other property documents filed for the record by the county recorder. The filing date and recorder's signature appear with each document often accompanied by the name of the party requesting the official recording of the document. Other documents within the same court cases are not recorded in these volumes as they would be in the court-created record books.

RETENTION:

Retain permanently

DISPOSITION:

May Transfer to Archives.

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series is authorized by Archives general schedule County official records, GRS-305.

4

TITLE: Deeds

DATES: i 1851-1961.

ARRANGEMENT: Chronological by date of entry in numbered registers

DESCRIPTION:

These are recorded copies of various types of deeds registered with the county recorder that show land ownership. Types of deeds may be sheriff's administrator, quit claim, guardian's probate, mayor's, and trust deeds. Information recorded includes entry number; date of deed; names of grantor and grantee, legal description of property; consideration given for the property; signatures; and date recorded. These volumes contain verbatim copies of deeds recorded by the county recorder. They contain the book and page number, address of grantee, legal description of property. Some counties separate deeds, while others compile them as part of the "Official records."

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series is authorized by Archives general schedule Deed records, GRS-735.

4

TITLE: Land patents

DATES: 1905-1964.

ARRANGEMENT: Chronological by date.

DESCRIPTION:

A patent is a deed transferring land from the federal or state government to an individual. During the nineteenth century federal policy supported transferring land in the public domain into private ownership. Individuals could purchase this land outright or they could obtain it in exchange for some kind of labor or development under such programs as the Homestead Act, the Timber Culture Act or the Desert Lands Act. Federal mining laws were also set up to encourage the development of mineral resources by offering ownership to individuals who discovered and developed the same. Additionally, the federal government granted many acres of land to the state of Utah, some of which the state in turn sold to individuals. The patents in these books are primarily for land, but also include mining rights. Information in the documents includes the names of grantee and grantor (grantor being a government), a legal description of the land, and application and certificate numbers. Each patent explains the laws and requirements which had been fulfilled in order to obtain the land or mining claim, and that a certificate for the same had been filed in the Salt Lake Land Office. Where water rights were involved, they were specified. The President of the United States signed federal patents and the governor signed state patents.

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series were specifically approved by the State Records Committee.

APPROVED: 03/1989

4

TITLE: Military discharges

DATES: 1921-1964.

ARRANGEMENT: Chronological by date.

DESCRIPTION:

Since 1923, Utah Code has provided that upon presentation, the county recorder shall record honorable discharges from the military, naval or marine service of the United State and any orders, citations, and decorations of honor relating to a person while in the military service of the United States. County recorders' copies are considered evidence with the same effect as the original. (Utah Code, 17-21-14, 2000). Military discharges contain extensive personal as well as military service and discharge information. Documents in this series include discharges from World War I, World War II, and the Korean War.

AGENCY: Iron County (Utah). County Recorder

SERIES: 23955

4

TITLE: Mining abstracts

DATES: 1955-1960.

ARRANGEMENT: Alphabetically grouped and thereunder chronological by date of location.

DESCRIPTION:

Utah county recorders are required by law to keep abstract records which show every conveyance, encumbrance, or other recorded instrument for every tract (Utah Code, Annotated, 1953, 17-21-6). The Iron County recorder began keeping similar abstracts for mining claims in 1955. Each abstract is a chronological list of official activity relating to a particular mining claim. For each claim, the recorder identified the mining district in which it was located, names of locators, the date of location, and the book and page number where notice of location was recorded. This information is followed by a chronological list of activity on the claim, including such things as proof of labor and sale or transfer. The record of each of these actions includes the names of grantee and grantor, and the date, book and page number on which each action was recorded. Because these abstracts cover only a five-year period, the list of activity for each claim is brief.

RETENTION AND DISPOSITION AUTHORIZATION:

These records are in Archives' permanent custody.

4

TITLE: Mining deeds

DATES: 1899-1964.

ARRANGEMENT: Chronological by date.

DESCRIPTION:

The Iron County recorder used these books to record mining deeds, mineral certificates and patents. Mining deeds transfer ownership or interest in mining claims from one party to another. Each deed designates the parties involved, names the consideration amount, and describes what is being transferred including the name and description of the claim. They also identify the township in which the claim is located. Deeds are signed by the seller, authorized by a notary public, and recorded by the county recorder. Mineral certificates and patents transfer final legal title from the federal government. Final ownership of any mining claim involved more than discovery, possession and recording, but also required that the claimant work the ground and perform labor or otherwise pay for the claim. (see Statutes at Large, Treaties, and Proclamations, of the United States of America, vol. XVII, chap. 152, also Revised statutes of the United States, chap. 6, title 32). When full payment had been received or the necessary requirements met, the land office issued a mineral certificate which the claimant had recorded by the county recorder. Certificates or patents state that the individual has entered and paid for the claim at the Salt Lake City land office. They describe the claim and also indicate its location in terms of township, range and section.

RETENTION AND DISPOSITION AUTHORIZATION:

AGENCY: Iron County (Utah). County Recorder

SERIES: 6144

4

TITLE: Mining location notices

DATES: 1881-1964.

ARRANGEMENT: Chronological by date.

DESCRIPTION:

Federal mining law enacted in 1872 provided that all valuable mineral deposits in the public domain were free and open to exploration and that the locators of the same were to have exclusive right of possession as long as they complied with the laws of the United States and of the local mining district. (Statutes at Large, Treaties, and Proclamations, of the United States of America, vol. XVII, chap. 152, also Revised Statutes of the United States, chap. 6, title 32). Federal law outlined that the first step toward ownership of mineral deposits was the discovery of a potentially productive site and recording the claim or notice of location. Primarily, the location notices in these books are for lode claims, which are identified sections of veins or lodes of quartz or other rock bearing gold, silver, cinnabar, lead, tin, copper, iron or other valuable deposits. A claim may equal but not exceed 1500 feet in length along the lode. Each notice of location recorded in these books contains the following information: name of claim, names of locators, date claim was located, date notice was filed, and a legal description of the claim including dimensions. In addition to location notices, these books contain the by-laws of Iron County mining districts. They contain documents relating to location notices, such as amended notices of location, mill site location notices, location certificates, and some notices of location for placer claims (see Book E).

TITLE: Mining location notices (placer claims)

DATES: 1905-1965.

ARRANGEMENT: Chronological by date.

DESCRIPTION:

Federal mining laws have provided that valuable mineral deposits in the public domain remain free and open to exploration and that the locators of the same have exclusive right of possession. The first step toward ownership of mineral deposits is the discovery of a potentially productive site and recording the claim or notice of location. Notices of location fall into two basic categories, which the Iron County recorder kept in separate books. Lode claims are identified sections of veins of quartz or other rock, bearing valuable deposits such as silver or gold, and are identified in terms of feet along the lode. Placer claims include other forms of deposit, typically petroleum, and are defined by identifying a tract of land encompassing the deposit. Location notices in this series include placer claims only. Each notice names the claim and includes the name or names of locators, the mining district, a description of the land, the dates of location and recording, and an explanation of the mining laws which authorize the claim.

TITLE: Miscellaneous records

DATES: 1897-1964.

ARRANGEMENT: Chronological by date.

DESCRIPTION:

The Iron County recorder kept a set of miscellaneous record books in which he or she recorded a variety of documents. He or she began the first miscellaneous record book with court decrees and other documents relating to the proceedings of 5th District Court (Iron County), but thereafter recorded numerous mining records. Primarily these include notices of location and documents showing proof of annual labor, but they also include other documents such as mineral certificates and forfeiture notices. The county recorder later recorded location notices elsewhere, but continued to record proof of labor and notices of intent to hold a claim in the miscellaneous record books. He or she also used these books to record documents validating individual qualifications, such as medical and dental licenses, bishop's certificates and the official bonds of local office holders. The recorder recorded documents relating to debts or delinquent taxes, such as redemption certificates, tax sale and sheriff's sale certificates, and lien waivers. He or she recorded a few articles of incorporation and city ordinances, as well as many personal documents such as powers of attorney, affidavits of identity, affidavits of citizenship, and death certificates. Early books include declarations of homestead. Book six contains easements for the installation of telephone lines. The last three books (recorded after 1950) are almost exclusively mining records.

TITLE: Stateline Mining District records transcript

DATES: 1896-1897.

ARRANGEMENT: By document type, thereunder chronological by date.

DESCRIPTION:

In 1896 the Stateline Mining District was organized in Stateline Canyon in northwestern Iron County where deposits of gold and silver ore had been discovered. In accordance with federal law, (see Statutes at Large, Treaties, and Proclamations, of the United States of America, vol. XVII, chap. 152), mineral deposits in the public domain were free and open to exploration, and locators of the same had exclusive right of possession. Local mining districts managed mining operations and recorded claims. Only one year after the organization of the Stateline District, the Utah Legislature enacted a mining law which transferred the responsibility of recording mining claims from the mining district recorder to the county recorder (Laws of Utah, 1897, chapter 36, "Mining Claims"). The Iron County recorder made a transcript of all records kept by the Stateline District for the one year of its existence which preceded the law change. This transcript consists primarily of notices of location, but also includes a power of attorney and a few mining deeds. Each location notice includes the names of locators, the name of the mining claim, a description of the claim, and indicates when and where the claim was originally recorded in the record book of the Stateline Mining District.
