SERIES: 6080 4

TITLE: Deeds DATES: 1852-1955.

ARRANGEMENT: chronological by volume, thereunder roughly chronological by document filing date.

**DESCRIPTION:** 

These are recorded copies of various types of deeds registered with the county recorder that show land ownership. Types of deeds may be sheriff, administrator, quit claim, guardian, probate, mayor, and trust deeds. Information recorded includes entry number; date of deed; names of grantor and grantee, legal description of property; consideration given for the property; signatures; and date recorded. When the Utah territorial legislature established regulations for the transfer and possession of real estate, they determined that a deed must be recorded by the county recorder for every transfer of property (Laws of Utah, 1852. p. 66-67). Early Tooele County deed books document the transfer of both land and mineral rights, however because of extensive mining in Tooele County, deeds relating to mining claims dominate Tooele County deed books through the first three decades of the territorial period. Early books contain numerous deeds involving P. Edward Connor. Connor, commander of federal troops and mining entrepreneur, has sometimes been called "father of Utah mining." Land deeds are scattered throughout the books. Of particular interest, Book A documents the allotment of farm and city lots in Tooele and Grantsville at the time of original settlement. Book B contains many consecration deeds. Land certificates are grouped in Book C. Land records dominate Books O, V, and Z, and include the mayor's deeds transferring federally recognized title to owners of town lots in Tooele.

TITLE: General mining index

**DATES:** 1869-1978.

ARRANGEMENT: Chronological with volume entries alphabetical by first letter of claim name, thereunder

chronological.

### **DESCRIPTION:**

The Tooele County recorder created a general index to mining related documents. This index not only provides reference to notices of location (claims) and mining deeds, but also to mineral certificates, bonds, mortgages, agreements, notices of sale, powers of attorney, mining district by-laws, patents, etc.

The first index (Mining Index Book A) provides only the name of a claim and the book and page number where a document was recorded. Thereafter, the index books also identify the type of document and the mining district in which the relevant claim was located. Beginning with Book K the date filed is also included. Entries made after 1955 include the county recorder's entry number.

TITLE: Mining records 1885-1955.

ARRANGEMENT: By document format in alphabetically labeled volumes, thereunder chronological by

date filed.

### **DESCRIPTION:**

Tooele County mining record books predominantly contain notices of location (mining claims) filed in the county recorder's office. In the late nineteenth and early twentieth century gold, copper, silver, lead and zinc were mined extensively in Tooele County. Each mine began with the discovery of a potentially productive site and the recording of a notice of location. Federal mining law enacted in 1872 provided that valuable mineral deposits were free and open to exploration and that the locators of the same were to have exclusive right of possession (Statutes at Large, Treaties, and Proclamations, of the United States of America, vol. 17, chap. 152, also Revised Statutes of the United States, chap. 6, title 32). Each notice of location affirms that the locator had complied with federal and local mining laws. Each notice provides a description of the claim, identifies it by a unique name, gives the mining district in which it was located, and provides the names of locators. Notices provide dates of location and recording and are signed by the Tooele County recorder. In addition to notices of location, Tooele County mining record books include other mining documents, such as agreements relating to mining, amendments to notices of location, mining district by-laws, and affidavits showing proof of annual assessment labor.

TITLE: Patented mining claims index

**DATES:** 1891-1978.

**ARRANGEMENT:** Alphabetical by first letter of claim name.

**DESCRIPTION:** 

As the agent responsible for recording documents relating mining claims, the Tooele County recorder created this index to the abstracts of patented claims. An abstract is a chronological list of documents relating to a particular claim. This index references mining claims abstracts, but includes only those claims for which owners had received a patent. Federal mining law enacted in 1872 provided that valuable mineral deposits in the public domain were free and open to exploration and that the locators of the same were to have exclusive right of possession (Statutes at Large, Treaties, and Proclamations, of the United States of America, vol. 17, chap. 152, also Revised Statutes of the United States, chap. 6, title 32). Claim owners could maintain rights to a claim by performing annual assessment labor, or they had the option to file for a patent. Patents provide outright ownership when the necessary requirements have been met.

TITLE: Willow Springs Mining District records

**DATES:** 1891-1900.

**ARRANGEMENT:** Chronological

**DESCRIPTION:** 

The Willow Springs Mining District, organized 21 May 1891 in the Deep Creek Mountains of western Tooele County (Utah), was an extension of mining activity at Gold Hill. Gold Hill prospectors organized this district in accordance with federal law, which stated that mineral deposits in the public domain were free and open to exploration, and locators of the same had exclusive right of possession (Statutes at Large, Treaties, and Proclamations, of the United States of America, vol. 17, 1872, chap. 152). The law authorized local mining districts to keep records and oversee mining operations within specified boundaries. The Willow Springs Mining District record books begin with a copy of by-laws for the district. By-laws are followed by notices of location (claims) filed with the district. Each notice prominently states the name of the claim and confirms compliance with federal law and local regulations. Notices provide information about the claim's dimensions and location, and identify the names of discoverers. They provide the dates for discovery and filing and are signed by the district or county recorder. While notices of location dominate, these books also include a few other mining related documents such as affidavits showing proof of annual assessment labor.
